

Minimal Clinically Important Difference for Six-minute Walk Test in Patients with HFrEF and Iron Deficiency
Supplementary appendix

Supplementary Figure 1 Patient flow diagram delineating patients included in main and sensitivity analyses

Caption: *Patient known to be alive and not hospitalised. 6MWT, six-minute walk test; FCM, ferric carboxymaltose; LOCF, last observation carried forward; PGA, patient global assessment.

Supplementary Figure 2 Scatterplot showing correlation between change in 6MWT and PGA Score at week 12

Supplementary Figure 3 Scatterplot showing correlation between change in 6MWT and PGA Score at week 24
