

**Factors affecting delayed loss of compensatory reserve (increased sRAP) after TSCI.**

**A.** sRAP values averaged over the first 3 h after surgery. Each dot is a patient, 79 patients, line is mean. Mean daily sRAP minus sRAP averaged over the first 3 h postoperatively vs. days after surgery for **B.** 45 patients with cervical TSCI, 29 patients with thoracic TSCI, and **C.** 21 patients had surgery within 24 h of TSCI, 58 patients 24 - 72 h of TSCI. Mean  $\pm$  standard error.
